

WEBCTRL® ADD-ON

TREND EXPORT

ADD-ON FOR THE WEBCTRL BUILDING AUTOMATION SYSTEM

The Trend Export add-on allows you to specify, manage, and export trend data from the WebCTRL building automation system so that it can be analyzed externally using third party analytics packages or tools. Trend data can be exported on-demand or at scheduled intervals. This provides building operators with a simple and powerful way to view their important building data inside their visualization tool of choice.

WebCTRL Add-on

Requires: WebCTRL system 8.0 or later with the latest cumulative patch

KEY FEATURES AND BENEFITS

- Supports export to a database or common .CSV format for the trend database for ease of use outside the WebCTRL system
- All available trend data can be exported
- Daily, hourly, and on-demand export options
- Scheduled trend exports only include new historical data received since the last report
- Trend data can be grouped and scheduled for added flexibility

The WebCTRL building automation system gives you the ability to understand your building operations and analyze the results. Integrate environmental, energy, security and safety systems into one powerful management tool that helps you reduce energy consumption, increase occupant comfort, and achieve sustainable building operations.
